

NAME	ADDRESS	QUESTION OR COMMENT
Charles Schultz	Twitter	How would your top choice of site for Central HS increase parental engagement and reduce bussing?
Holly Nelson	Email	An enormous amount of time and money has been invested in this high school site selection. How would you panelists propose that the school board move forward to make a decision?
Kristine Chalifoux	1110 W. Park	What if we can't find a perfect site (i.e. one near the center of town)?
Melodye Rosales	618 W Hill	I would like to speak less about foot prints on the front-end and put it on the back-end. I believe the site should be driven by the conversation I had with Malito. He spoke of S.T.E.A.M, tennis fields, science labs, Arts programs, Social Justice areas, swimmint, athletic/track fields, environmental landscape, vocational tech labs. We are the University of IL. We will bring people and retain family growth-once these offerings are set in stone. It will tell us where a footprint fits.
Sujata Dey-Koontz	710 S. Lynn	Where are the other areas if we go with variety of campuses? The locations, empty space, etc.? And transportation, race, demographics. And student responsibilities.
Chambanamoms	Twitter	How do we get from conjecture to action on developing this new facility?
Sujata Dey-Koontz	710 S Lynn	If kids are going to Parkland, it doesn't matter if the are in a "school building" per se at the old or a future new building. We are needing to educate, then the kids who choose may go to other locations. Parkland, U of I, or on the job and not be on a campus, per se. They need education.1/2 time campus presence. Give our young people responsibility of their learning time and environment...and how they want to learn.
Laurie Andrews	1124 W. Daniel	As mentioned, we've been talking about this since 2009. While I appreciate that the district has gathered data, feedback from residents, and is carefully considering this big decision, it is time to act! Can we get some sort of timeline in terms of when we'll see something happen?
Sujata Dey-Koontz	710 S. Lynn	Why the rush? Science labs mandated? We don't know what our community will look like in 20, 25, ...50 years. Our population, demographics, WILL CHANGE. Student, community needs may change. Transportation may change. What we need is focus on the learning...because "money coming" may change and should not be assumed.
Sujata Dey-Koontz	710 S. Lynn	What about safety- police, fire, medical? Why are these students in the mindset of "everything on-site" because life may and will look different 20, 25, or even the next 10 years in the future. We need to focus on learning now, in and how...we want to have access and graduate students.
Chuck Jackson	514 W Hill	What percent of the students who participate in extra curricular activities don't graduate? Put another way, what is the overlap between the academic needs and the extra curricular activities?
Sujata Dey-Koontz	710 S. Lynn	Then why not a new additional high school w/ the bubble of young children? Why not take capable students and give them opportunity for not being physically on campus all the time. Look at a 20-25 year thinking differently and not be stuck in the "grease". We are always on the edge of new ideas. Not the old ones in Champaign. Let's think innovatively.
Daniel Fossier	2607 Cherry Creek Rd.	Realistically, might my 7th grade son-projected HS graduation of 2019-attend a "new" Central HS?
Minnie Pearson	1904 Kensington Knoll Dr	How would the location to Savoy bring about the diversity that is expected and needed in our community, without putting the transportation = on the Black students. Long bus rides?
Tiffany Gholson	1711 Nancy Beth Drive	I can speak briefly for another type of student. The ones who don't care about track fields or theatres- but are really concerned about the time and expense it will take to get to school (depending on it's location), how feasible it might be to get to work- or how their parents might make it to their school when necessary. The school bus doesn't pick up parents!
Erin Bauer	2009 O'Donnell	Is there a figure that shows the demographic distribution? That can be shown tonight? If not, don't ask the questions. Bloomington built their HS on the fringe, do they like it there?
Theo Jackson	514 W. Hill Street C	What is the most important aspect of placement for a new high school?
Jeff Daniels	1112 W. Healey (Former)	Have you considered, or would you ponder, the plot of land currently occupied by south side school, the Mellon building, and fields to the south of these buildings in order to keep Central in Central Champaign? South side could move to Edison & Edison could move to Central- so could the Mellon Building!
Patricia Brady	701 W Healey	The opening presentations provided a good overview of the current situation in Unit 4, but I would like to know about the various options for a Central HS location (as shown on the handout). Could you provide a brief overview? And, are there options not shown on the map?
Lee Ann Kelly	1010 W Park	Attendance is key to graduation. Given the number of students that walk, how are we going to continue to maximize access to the campus?
Katie Hubbard	611 Bergamot St. Savoy	It seems to me the lightning rod issue for a new school is LOCATION, LOCATION, LOCATION. The beauty of the present location of Central high school is that it is CENTRAL. It seems a location in the far north of far south of town will not help race relations in town. Is this an accurate perception?
Minnie Pearson	1904 Kensington Knoll Dr	It is the view & question of the NAACP that this board and this district that when making the decision to build a new Central High School and what ever location will not put the hardship, transportation and long bus rides, on the African American Community students and parents.
Jim Miner	Email	My main issue with the proposed bond measures is that there have only been "cadillac" plans proposed. There has been no discussion of making due with the minimum. I want to see a basic plan that would address our needs in a cost-effective manner.
Azark Cobbs	1619 Lockraven	The site at Country Fair- would the EPA be responsible for clean up, or Unit 4 if we buy the site?
Sue Plattner	3111 Gold Medal Dr	Have you considered the are of Judah/Franklin MS/Spalding Park for the new Central?
Alison Smith	604 Buttercup Dr, Savoy	Through the sales tax, we have funding for the land for Central. Can we afford all the sites?
Dr. John Canfield	2508 Fields South Dr, Apt 20	What does a "free and equal educational opportunity" mean to this committee?
Lisa Wilson	1216 W. Charles	A new high school to replace Central is an essential part of the continued economic growth of our community. How does the board and administration plan to handle opposition to their plan? Are public relations efforts being considered to educate the public about the drastic need for a new building?
Chuck Jackson	514 W Hill St, C	With all the online learning, why the need for such a large building with all the talk of 21st Century? Let's think outside the box. Why are the smaller sites so casually discarded? We'd like to hear more about those possibilities.
Erin Bauer		Can we stay on topic of choosing a location? How have other communities that have built hs's on the fringe of the town, i.e. Bloomington/Normal, dealt with moving the hs from center of town. Has it worked? What would they change? Would they do it again?
